

Câu 2.

```
public class SinhVien extends Ngucoi {  
    protected String maSV;  
    protected double diemTB;
```

```
    public hoc SinhVien() {  
        super();
```

```
        this.maSV = "";
```

```
        this.diemTB = 0.0;
```

```
    }  
    public SinhVien(String ho, String  
        ten, String ngay Sinh, String maSV,  
        double diemTB) {
```

```
        super(ho, ten, ngay Sinh);
```

```
        this.maSV = maSV;
```

```
        this.diemTB = diemTB;
```

③ Override

```
public void nhap() {
```

```
    super.nhap();
```

```
    Scanner SC = new Scanner(System.in);
```

```
    System.out.print("Nhap maSV: ");
```

```
    maSV = SC.nextLine();
```

```
    System.out.print("Nhap diem TB: ");
```

```
    diemTB = SC.nextDouble();
```

```
    SC.nextLine();
```

}
